

ProPower Peel

Post-Care Instruction

Your full participation during and after the ProPower Peel treatment will determine the outcome. It is important that you strictly adhere to the post-care products and regimen that your Professional Skin Therapist has recommended. It is possible to have a poor reaction or less-than-expected improvement on the skin. No guarantee is made or implied regarding your precise results, peeling times or discomfort.

After treatment you may experience some tightening of the skin, which may last several days. Light flaking may begin with 1-3 days and will usually subside within 7-10 days; however, it is impossible to predict this shedding process.

ProPower Peel

Post-Care Instruction

Please follow the post-care instructions below, and notify your professional skin therapist if you have any concerns or adverse reactions.

1

Apply sunscreen protection (minimum SPF30) **daily** following treatment.

5

Do not pick or peel at scabs, blisters or loose skin, as scarring may occur.

2

Follow the prescribed post-care instructions.

6

Avoid excessive heat sources (such as sun exposure or dry saunas and steam rooms).

3

Avoid direct sun for 2-3 weeks.

4

Do not wax or use any type of exfoliating product for 72 hours or until your skin shows no signs of sensitivity.

7

Avoid strenuous exercise or any activity that could lead to increased blood circulation to the face for 24 hours following treatment.
